Ricoh Universal Print Driver

Versatile Print Management

Managing print drivers is a constant battle, whether your organization has one IT administrator or an entire department. The RICOH® Universal Print Driver provides a convenient and cost-effective alternative. Install it just once, and when output devices are upgraded or replaced there is no need to uninstall or reinstall another print driver.

Reduce Support Costs

The Ricoh Universal Print Driver helps reduce total cost of ownership (TCO) and makes life easier for IT.

- Print from a wide range of Ricoh and non-Ricoh laser printers and multifunction products (MFPs) using a single, flexible driver that replaces product-specific drivers.
- Eliminate the time-consuming task of analyzing driver compatibility, installing drivers at individual workstations and retraining users how to access specific print features.
- Shorten the certification process for new print devices.
- Integrate new Ricoh output devices on the network without installing new drivers.
- Reduce help desk calls from users who can't print due to driver incompatibility or related issues.
- Save time and redirect IT resources to other important activities, relieving the burden on IT.
- Get more value from your output systems with Ricoh Universal Print Driver, which is available at no cost.

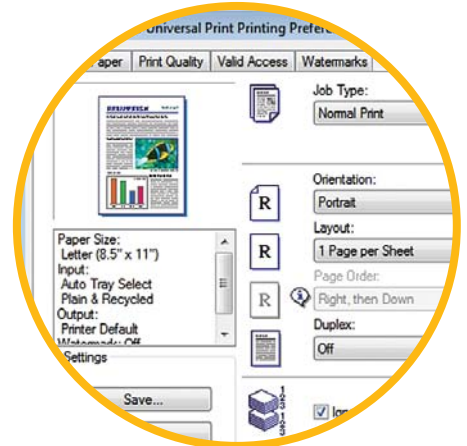

Increase User Convenience

The Universal Print Driver creates an environment where every user can print quickly and easily.

- Remove any confusion about which driver users should select, regardless of the print device they are installing.
- Improve user productivity by allowing access to all printing functions on a wide range of Ricoh printers and MFPs through a single, easy-to-use driver.
- Simplify every user's experience with a common interface that enables printing from a variety of non-Ricoh printers and MFPs.
- Reduce the need for expensive IT outsourcing in small and medium-sized businesses (SMBs).
- Deploy the driver with confidence in multilingual environments. Its interface supports six languages.
- Allow selectable device destination prior to printing with support for the PrinterSwitcher utility.
- Store print jobs securely with support for the ELP-NX FlexRelease Server option, whereby jobs can be accessed and released from any ELP-NX enabled Ricoh MFP on the network.

The Universal Print Driver makes it easier for IT teams to ensure successful printing with minimal driver management. It is available at no cost and can be downloaded from www.ricoh-usa.com.

Users gain access to all the conventional print functions of Ricoh printers and MFPs through a single, versatile driver.

Specifications

Operating Systems: Windows 2000/XP/Vista/7, Windows Server 2003/2008/2008R2 (x32 and x64)
